- Use as a gate break

MULTI-PURPOSE - FEATURES A LIVE WIRE HOOK AND AN INSULATED HOOK

Live wire hook

Insulated hook

VERSATILE - CONNECT TEMPORARY FENCE WIRE, TAPE OR BUNGY

Wire

Tape

Bungy

USING THE ZAMMR HANDLE:

- as a **live hook in temporary fencing**

Hook the ZAMMR Handle to a live fence line with the insulated hook to eliminate voltage while you set up your temporary fence.

Then with a smooth, simple movement change to the live wire hook to allow voltage through the stainless steel backbone of the handle and onto your temporary fence wire or tape.

- as an **insulated hook in temporary fencing**

No need to change handles when power supply from a permanent live wire is unavailable.

Simply hook your ZAMMR handle to the fence line with the insulated hook and connect a portable energizer.

Easily winds back through pigtails - when you're ready to move the temporary fence, simply unhook the ZAMMR Handle and wind in your reel. No need to remove the handle, it has been designed to easily wind back through pigtail standards.

- as a **gate break**

Connect to your activator plate in a gate break using the live wire hook. Ideal for bungy gates, the robust ZAMMR Handle will withstand the toughest gateway environments.
